What You'll Learn:

- How to ask ChatGPT to create code for your site

- How to add the custom code to your site

Action Steps:

- Identify problems on your site that you want fixed and work with ChatGPT to solve them

- Test the code to ensure it works. If it doesn't, ask ChatGPT to fix the code

- ALWAYS back up your site before making major changes to code that you can't easily remove in the CSS area or cl files.
