

# Filter by IP or Network Address

---

## 1. Match by Source IP or Network Address

Match: **-s** IP, **--source** IP

**Example:** `iptables -A INPUT -s 100.0.0.0/16 -j DROP`

## 2. Match by Destination IP or Network Address

Match: **-d** IP, **--destination** IP

**Example:** `iptables -A FORWARD -d 80.0.0.1 -j DROP`

`iptables -A OUTPUT -d www.ubuntu.com -j DROP`
